Network Testbed Sprint 4

Paige Brasfield, Logan Jacobs, Dylan Stellman, Fernando Bresso, Selim Harzallah

Agenda

01 Project Overview

02 Sprint 4 Goals

03 Demo

04 Next Steps

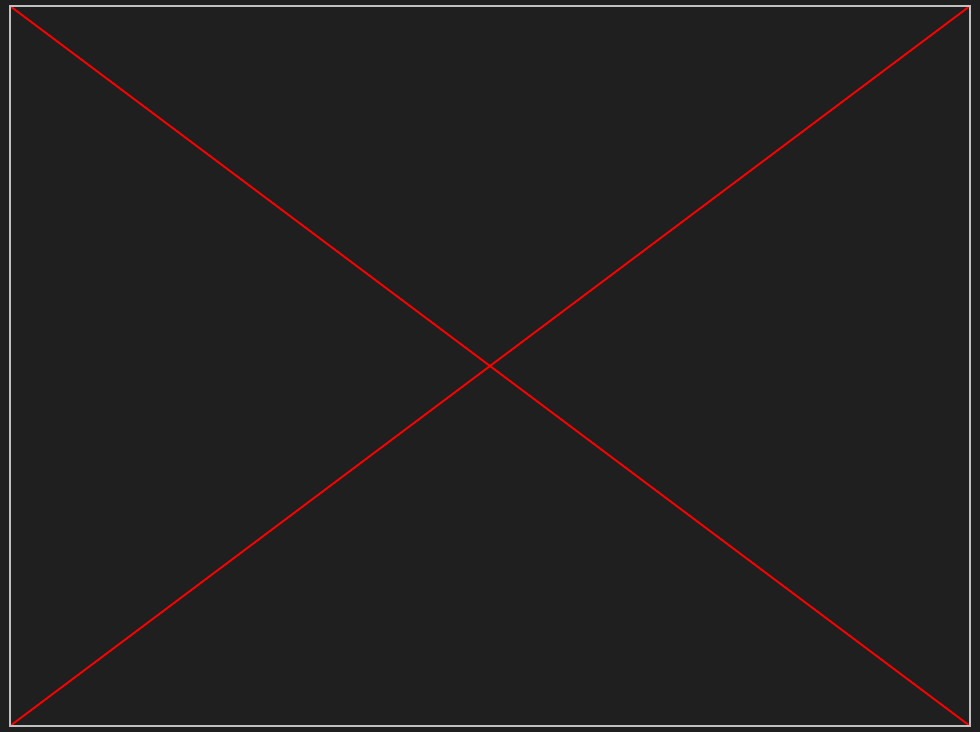
Project Overview

A network simulation platform that represents network traffic during cyber attack scenarios. Designed for open use, we include tested, representative topologies that allow users to test custom network metrics and measure performance under simulated conditions and attacks

Sprint 4 Goals

- Create + integrate attack GUI
- Test all attacks on our topologies
- Organize files for public use

Demo



What we missed

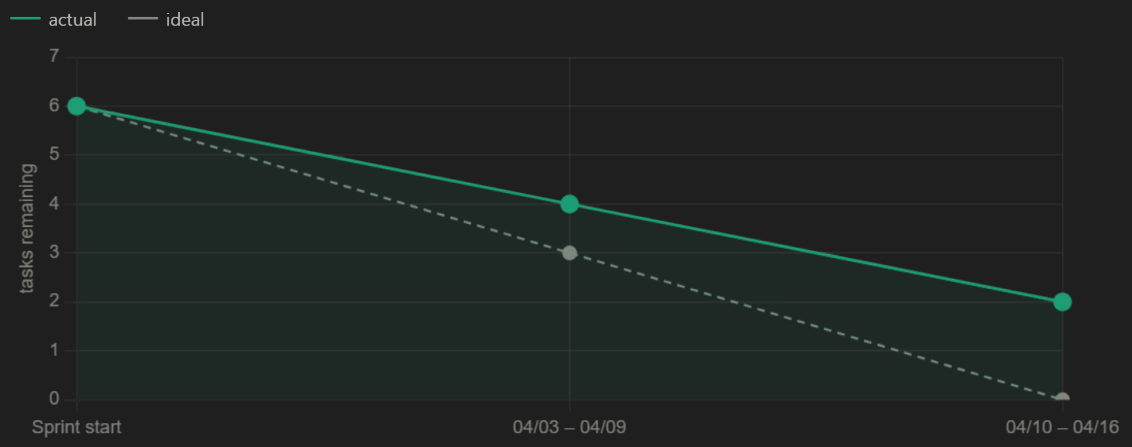
- Finishing up documentation
- General code organization

Group Total Hours Logged on Clockify

Week	Total hours
Apr 3 - Apr 9	39 (8)
Apr 10 - Apr 16	26 (5)

Burndown chart

total tasks	completed	remaining
6	4	2



Next steps

Innovation Day

- Finish all documentation
- Finish all code organization
- Finish poster

Thank you!
